
INFRASTRUCTURE ENGINEER

Department: Infrastructure

Job level: Entry/Middle

ACROM is looking for an Infrastructure Engineer willing to learn new technologies and participate in various internal and international projects.

Day to day work:

- Propose/validate/test IT infrastructure solutions to various business needs;
- Prepare technical documentation
- Remote infrastructure/applications deployment for external customers
- Provide advanced technical support for various technologies/solutions/services, as needed
- Participate in training sessions of new solutions/technologies, and subsequently train others
- Take ownership of IT projects and coordinate other users, business partners and support organizations

Job Qualifications:

- Experience
 - in server/infrastructure management (Microsoft environment is preferred)
 - with Active Directory
 - with embedded systems
 - with server virtualization and networking is a plus
- Technical certifications (e.g. Microsoft)
- Knowledge of scripting (shell scripts, batch files etc.)
- English proficiency
- Willingness and availability to potentially travel, mostly in Europe
- From a personality standpoint, we are looking for a hands-on, practical, energetic person, able to deal with ambiguity and take ownership of own actions. Other skills which will enable the Infrastructure Engineer to be successful in his/ her role:
 - Prioritization and ability to deliver on multiple projects simultaneously

- Customer Focus and Service Delivery: continually delivering, measuring and improving an excellent service to internal and external customers
- Continuous Improvement and Change: contribute to and support change to improve and develop services
- Resilience: Deals effectively with pressure; remains optimistic and persistent, even under adversity
- Flexibility: Is open to change and new information; rapidly adapts to new information, changing conditions, or unexpected obstacles
